**Community of Love**

We seem to be moving more and more towards a  
contactless society, where our own existence and our  
own needs are of primary importance, and meeting  
these needs can be done without contact with another  
human being. Not only that, but less contact with  
others means less insight into the needs of others as  
well. In that situation others suffer, and we all are  
deprived of the experience of developing empathy and  
of helping our fellow human beings. Our drive towards  
a contactless society will deprive us of many things, not  
least the richness that comes from sometimes messy  
face to face contact with another human being.
